SUMMARY

Motivated Computer Science student specializing in AI & ML, currently focused on full-stack development and building real-world applications. Skilled in MERN stack and modern web technologies with hands-on project experience. Passionate about problem-solving and developing scalable, user-friendly solutions

PROJECT

Startup & Social Innovation Platform

- Built a full-stack platform for startup and social innovation support
- Developed responsive UI using React and structured backend using Node.js
- Integrated AI-based recommendation features
- Designed scalable and user-friendly system architecture.

ProTask AI

- Developed a task management system using React and TypeScript
- Implemented secure authentication and database integration with Supabase
- Applied user-based CRUD operations with Row Level Security
- Deployed application using Vercel.

Medical Chatbot (MediBot)

- Built an AI-powered medical chatbot using LangChain RAG and Llama 3 (Ollama) to deliver accurate, context-aware responses from medical documents
- Implemented Pinecone vector database with Hugging Face embeddings for fast and scalable semantic search
- Developed a responsive full-stack web application (Flask, Bootstrap, AJAX) enabling real-time user interaction.

EDUCATION

B.Tech in Computer Science (AI & ML)

Geethanjali College of Engineering and Technology • 2023-2027 • 8.1
• CGPA: 8.1.

Intermediate (MPC)

Narayana Junior College • 2021-2023 • 96.6%
• Percentage: 96.6%.

School

Naagarjuna Model School • 2012-2020 • 100%
• Percentage: 100%.

CERTIFICATIONS

MERN Stack Training-Cantilever Labs

2025

HTML & CSS-HackerRank

2025

Python - Cisco & Kaggle Data Analysis

AWARDS & HONORS

Runner-Up

Startup & Social Innovation Competition

Product Development (Apprenticeship)

Gennovate Foundation Club

SKILLS

Programming: C, Java, Python, SQL

Web: HTML, CSS, React, Node.js, Express, MongoDB

Libraries: Pandas, NumPy

Tools: Git, VS Code, Jupyter, Google Colab

Cloud: Vercel, Supabase
